The Pots Company | Our values

Architectural design

We do not work with product designers, we have architects responsible for the design of our pots. This means our pots are conceived in a completely other way. Architectural design means smart, well thought out, sleek and a combination of form and function. Aesthetics is key. Our pots will always have to be stunning in every way possible.

Timeless

We develop ranges which are not bound by trends. We want our products to be pretty and relevant not only today, but also tomorrow and in ten years' time. This has some significant advantages: Consumers will always be able to buy matching pots to the ones they already have, making repeat sales more likely. Because our ranges are timeless, resellers won't be stuck with unsellable stock. What isn't sold this year can still be sold the next without the need for a sale.

Durable

Durability is our main concern. We not only want our products to withstand trends design-wise, we also want them to stand the test of time. Because of this we develop our products with the highest quality and in the case of Ecopots, also with the use of a durable recycled based composite. We want all our pots to be breakproof, frost resistant and UV resistant while still being lightweight and stunning. Basically, we want our products to look good and stay good for at least 10 years.

Innovative

Another result of our architectural design approach is innovation. We want to add new, smart things to the world of pottery like invisible suspension systems, integrated drainage systems and new use of materials.

Carefree

Products from The Pots Company are carefree. With easy unboxing, stacking and practical use. We stand for our products. This means all our products come with a 10 year warranty on breakage and production faults. And when there is an issue, with resellers or consumers, it is our challenge to resolve this quick, smooth and to every ones satisfaction. Carefree in every possible way.

Conceptual (shop) presentations

Buying decisions regarding pottery are often made in the shop itself, so it is key to grasp consumers attention in order to tell and sell your story. This is why The Pots Company puts a lot of effort in creating stunning POS material for our brands to bring forth the strong- points and story of the respective brand.

The **POTS** Company nv

Ecopots, durability by design

Clean, simple lines. A minimalist design where functionality goes hand in hand with beauty. Made from recycled materials with a unique, handmade finish and completely recyclable. Belgian designed Ecopots follows the Scandinavian design philosophy which brings a sense of calm that so many are missing in their daily, stressful life.

When we designed Ecopots more than ten years ago, no one had heard about the 'plastic soup'. No one was thinking about using recycled materials for their flower pots and planters. But we did. We saw the need and potential to use recycled materials for our products and continue to do so today.

Our vision

Both our economies and products are becoming increasingly sustainable. That being said, sustainability is so much more than simply the responsible use of raw materials. We believe in developing products that are sustainable both in terms of durability and style. They should withstand damage and wear and tear, whilst remaining relevant and aesthetically pleasing for their users. After all, to us, the most sustainable products are those you can enjoy year after year, without the need to replace them.

Our brand's mission

Ecopots gives 'sustainability' a different meaning. We design, produce and sell pots made from a recycled based composite and ensure they are sturdy, beautiful and stylish, not only today, but also tomorrow and in 10 years' time.

The first brand in flowerpots with a CO2 neutral label

Being a durable brand we like to take things a step further and reduce our ecological footprint even more. In November 2020 we were the first brand in flower pots and planters to receive both the CO2 Neutral Product and the CO2 Neutral Company certificate. This certificate guarantees our calculation, reduction and compensation of our local and global impact. The certificate can only be obtained through serious climate efforts and is validated by Vincotte. Through the CO2Logic programme we support three amazing climate projects. More info about these projects: www.ecopots.com/about-ecopots.

Many times copied, never matched

At Ecopots, we only want to produce pots of superior quality. This is why we have teamed up with Centexbel, a university plastics laboratory, for the development of truly durable plastics and we ask Bureau Veritas to test our products.

- FFU (freeze test, colourfastness test and leakage test)
- Polycyclic Aromatic Hydrocarbons (PAHs) Content
- Candidate List of Substances of Very High Concern for authorization published by European Chemicals Agency (ECHA) Regarding Regulation (EC) No. 1907/2006
- REACH
- Social audits (BSCI / SEDEX)
- QA-CER by the Belgian Quality Association (BQA) and PolyCert Europe
- Certification Forest Stewardship Council (FSC)
- Certification CO2 neutral product (Vincotte)
- Certification CO2 neutral company (Vincotte)

Recycled based composite

All Ecopots are made from a unique formula containing 80% high quality recycled plastics for a strong structure, 17% recycled natural minerals to improve durability and 3% natural mineral pigments for a timeless colour and UV protection. Supervised by the Belgian Quality Association, all Ecopots are validated for recycled content and we achieve the quality standards defined by PolyCert Europe. Every year, our certifications are evaluated and renewed to guarantee the best quality.

The origin of our recycled materials:

- 15% post-consumer plastics from PET and plastic shopping bags
- 80% post-industrial waste (LDPE 23% ; HDPE 35%; PP 42%)
 - PE from plastic bottles, coatings, packaging foil and plastic tubes
 - PP from diapers and sanitary napkins
- 5% circular waste from production defects, reclaimed in our factory

Our goal is to realise a stable and reliable operation which can only be accomplished by working together with accredited companies to ensure the best quality, time and time again. That is why we have started a partnership with PolyCert Europe. PolyCert Europe uses existing certifications for harmonized audits of polymer-based converting industries, helping us verify quality standards and ensure that the products live up to our expectations.

Unique handmade finish

All Ecopots have a unique, handmade finish, making each pot different. Our compound formula of recycled plastics and natural minerals makes the pot not only strong and durable, but also very light. Ecopots are UV resistant, break-proof and resistant to temperature fluctuations, ideal for both indoor and outdoor use. They have a unique natural look and feel, making Ecopots the go-to brand for everybody looking to combine timeless design and durability.

Timeless shapes and colours

At Ecopots, we develop products which are not bound by trends. That is why we follow the Scandinavian design philosophy. In short, this philosophy is about creating a calm and clutter free home as a counter balance to our hectic and stressful daily lives. It is characterized by clean and simple lines, minimalism and the use of natural colours and materials.

Key design features

An Ecopots goes through many hands during the production process. All these hands combined represent many years of experience and craftsmanship. At the start of each new design, our design team works closely with the production manager. The designers are responsible for the best looking proportions and functionality, while the production manager is in charge of the strength and quality of the product.

Ecopots and its functionality: now undeniably proven

The three pillars on which the Ecopots brand is built are design, durability and functionality. The latter because plants only thrive when the environment in which they live are optimal. Not only does the plant need good potting soil, regular feeding and watering on time, the right pot is equally important. At Ecopots we have known this for a long time, and now it has been conclusively proven through technical tests. In mid-2022, The Pots Company, the company behind the Ecopots brand, commissioned the Trial Station for Ornamental Horticulture in Destelbergen (Belgium) to carry out a whole series of tests. This involved comparing a lot of different pots in terms of their performance and their influence on plant quality. The plant included in the test was *Spathiphyllum* or Peace Lily.

Trial Station for
Ornamental Horticulture
Destelbergen (Belgium)

At the end of the trials, plant quality was evaluated by root development and fresh weight. The big winner was Ecopots Venice 2 which led to superb root development, resulting in strong plants with large, full leaves. Helping to achieve these results was the large integrated water reservoir of Venice 2 which continuously supplies the roots with sufficient water. Through natural capillary action, water reaches the upper plant parts on a constant basis. This system continues to function, even in difficult conditions such as high temperature and low humidity. It keeps the plant in top condition for a long time.

By technical testing, Ecopots is committed to improve functionality and continues to build on expertise to develop the most optimal housing for plants. Our products allow plants to flourish and last a long time, similar to what an architect does when designing a house; include water supply, insulation, ventilation... Ecopots combines timeless design with durability and the functionality of its products. Products such as hanging systems, integrated wheels and much more. The brand remains committed to smart innovations to further increase the ease of use.

Ecopots invests in branding

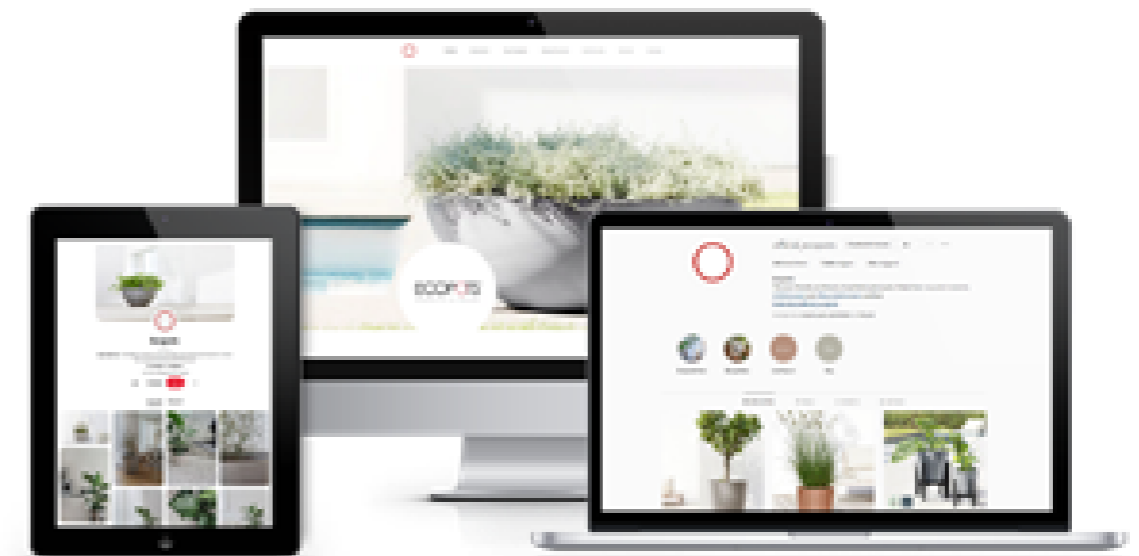

Over the past years, Ecopots has undoubtedly become a very well-known brand in the world of pots, plants and garden. A vibrant brand with a clear signature and a unique look. A brand in which investments are made, in both offline and online support. Creating momentum to further build its reputation. In this way, we stimulate the rotation of sales even more, so that Ecopots will soon adorn every family's living room or terrace.

Support offline

- Highly attractive shop-in-shop concepts
- According to clearly applied styling and principles based on the brand
- To create an experience on the Ecopots shelf, as well as help with navigation (models, colours, sizes...)
- Info about product features, USPs...

Support online

- Inviting, modern and highly attractive website with clear navigation
- Clear store locator
- Active presence on social media: Facebook, Instagram, Pinterest, TikTok.
- Structured campaigns to reach the right audience.
- Ongoing investment to create a community of people with interests in design, sustainability and plants

Ecopots Perfect Fit

Custom-made Ecopots that fit around nursery pots perfectly! Aimed at customers who lack the knowledge or time to pot a plant and are looking for ready-made solutions. An Ecopots Perfect Fit can be paired with your best selling plants or even sold as a pot-plant combination.

An Ecopots Perfect Fit means you win valuable space to present your pots and plants or have them delivered to your customers. Every centimeter counts, literally. These entry-level Ecopots are developed for promotional purposes to introduce consumers to the Ecopots brand.

The Perfect Fit series are available in two new shapes, Ecopots Miami and Ecopots Lima. For inquiries, terms and conditions contact your Ecopots sales representative.

Venice 2 (patent BE 2022/5209)

Plants thrive best when given just the right amount of water. Correct watering is a real challenge for many. With Venice 2 from Ecopots, equipped with an integrated water reservoir, overwatering is a thing of the past. The stylish side opening makes it particularly easy to water and allows to check the water level at any time. And when the plant needs water, it draws it from the reservoir through natural capillary action. Moreover, the roots never stand in the water. Ecopots Venice 2 combines everything Ecopots stands for: excellent functionality with a beautiful, timeless design.

Trials carried out at a recognized research station in Belgium proved that plants growing in an Ecopots Venice have significantly better root and leaf development. The result is a healthy plant that grows smoothly, has beautiful and full leaves and remains in top condition for a long time.

Dubai (patent BE 2022/5210)

All good things come in threes. This also applies to decorative arrangements with plants. People often look for an ensemble in which different species and sizes can be combined harmoniously. Ecopots has developed the Dubai model for this purpose, which combines three different pot sizes and heights on one saucer.

Besides its design, Dubai also convinces with its functionality. Watering is done via the saucer, with the watering water spreading evenly to the water reservoirs underneath the pots. Through natural capillary action, the plants absorb water from the reservoir when they need it. Moreover, thanks to invisible integrated wheels, the ensemble can always be positioned precisely in the desired location. Ecopots Dubai can be used both indoors and outdoors.

Manhattan Wall

More and more people are living in cities. For those who don't have a garden or for those who lack the space on their balcony, Ecopots has the solution. Create your own vertical garden with a combination of Manhattan pots! They can be installed on any size of wall thanks to its modular design.

All of our Manhattan wall products include an installation template which can be very useful when installing a vertical garden. The template has various readymade patterns to choose from, simply place the sheet of paper against your wall and drill out the corresponding holes.

Indoor Water System

Never too wet, never too dry. With the indoor water system designed for the Ecopots flower pots and planters you always know how much water your plant has left and when it needs a refill. And refilling the water reservoir is as easy as you would expect from an Ecopots.

Ecopots and it's POS material

The philosophy of Ecopots focuses on durability. Its recycled based composite is strong and lasts long. It's only logical that we extend that long term thinking in the quality of our Point of Sales Materials. While other brands focus on providing cheap throw-away POS material, Ecopots wants to offer a better, long life quality for a reasonable price. This way the POS concepts of Ecopots keep their nice looks and attraction on the shopfloor for a long time which is crucial for the selling out of the products... POS materials pays off!
