

Spathiphyllum wallisii

spath-ee-FIL-um wall-iss-ee-eye

Common Names: Peace Lily, White Sails, Spathe Flower, Cobra Plant

Family: Araceae

Origin: Tropical America

Growth: Clumping

Light: Low - medium

Foot Candles: 50 - 150

Water: Keep evenly moist

Humidity: 30% - 60%

Temperature: 16°C - 26°C

Soil: Regular potting mix

Container: Self-watering planter, living wall

Nutrients: 15-15-10 Monthly

Propagation: Seed or division

Interiorscape Use: Low-maintenance flowering plant, reception, living walls

Common Pests: Mealybugs, Aphids, Spider Mites, Scale, Thrips.

Common Issues: Prone to leaf droop but will come back just fine.

Comments: The plant enjoys being somewhat pot-bound and thrives in self-watering reservoir type planters. Will flower throughout the year with minimal fertilizing. The NASA Clean Air Study found that *Spathiphyllum wallisii* cleans indoor air of certain environmental contaminants, including benzene and formaldehyde.

Toxicity: The leaves of the Peace Lily can be poisonous if eaten in large quantities. Symptoms include severe pain in the mouth and a burning sensation to the lips, tongue, and throat; difficulty swallowing.
